

**VIRTUALLY
INVISIBLE**

Paint protection film is a clear protective urethane film that is virtually invisible once installed and protects the paint of your vehicle from unsightly damage and maximizes resale value.

It is precisely cut specific to each vehicle. There are many coverage options starting from the front end to full vehicle coverage. Contact your dealership today to find the best option for your vehicle.

FAQ

Can the film be removed?

Yes, the film can be removed at any time without causing damage and without leaving residue.

Will my vehicle's paint fade or look different when the film is removed?

No, the film is not UV resistant and therefore, the paint will fade at the same rate on areas where there is film as areas without film.

Does the film require special care?

Special care is not required. Simply wash and wax your vehicle as if it the film was paint.

5 THINGS TO KNOW ABOUT PAINT PROTECTION FILM

CLEAR PROTECTION

The film is nearly invisible once installed and optically clear without orange peel finish – keeping the paint looking new for years to come.

STAIN & DISCOLORATION RESISTANT

Innovative, hydrophobic top coat resists stains and yellowing from bird droppings, air pollution, road salt, and road grime.

SELF-HEALING

The top layer of the film allows fine scratches and swirls to disappear or “self-heal” when heated with hot water or under the warmth of the sun.

TRAINED AND CERTIFIED INSTALLERS

All installers are professionally trained and certified to achieve a high quality and near invisible install every time.

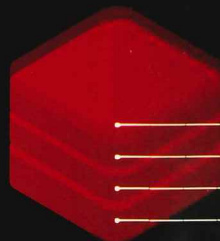

PRECISE PATTERNS AND FITMENT

Our advanced film cutting software allows our installers to precisely install the film on the areas of your vehicle you choose to protect.
