THE VISION

We want to welcome you to the Ineos Grenadier community. We're beyond proud to have been selected as your dealer for the greater Southern California area. We will do you, ourselves and this new community proud.

The purpose of this catalog is to offer our Grenadier owners options for customization and protection for the long journey ahead. These items are designed to enhance your comfort and fulfill your desire for individualization while adding value to your Grenadier.

In Southern California, beyond the sandy deserts and mountain trails, we also face extreme UV exposure, something that over time can cause real harm to your finishes. We believe these products will not only make your Grenadier stand out, but more importantly stand up for the hard roads and great times that lie ahead. It's with this mindset we're pleased to provide these products and services.

-Your team at Ineos Grenadier

LEVEL 1

BONNET STAMPS AND VENTS, REAR “LAMBDA” LOGOS

Customize your Grenadier by filling in the stamps on the front hood and rear “Lambda” logos in the color of your choosing.

Installation time: ½ day

Retail: \$299

LEVEL 2

PROTOTYPE GRAPHICS

**FRONT TRIM, REAR 30% DOOR,
A-PILLARS, REAR TRIM, ROOF
CROSS**

Originally designed as a factory option but subsequently not offered for the US market, these graphics make a statement as bold as your Grenadier which also provides light protection to these vulnerable areas.

Please see next page for package details >

LEVEL 2

PROTOTYPE GRAPHIC DETAILS

FRONT TRIM

Applied to the painted surfaces of the radiator grille and surrounds, front headlamp surrounds, front of bonnet and the front fenders. On highway driving it helps protect these exposed vertical surfaces from rock chips and sand blast.

Retail: \$595

A-PILLARS

Applied to the painted surface running on the sides of the windshield, down the body contour and along the rear edge of the front fenders.

Retail: \$495

REAR 30% DOOR

As the rear door that likely will be used most often, the wrap provides light protection against abrasions while highlighting the intelligent design of the Grenadier.

Retail: \$495

REAR TRIM

Accentuate the width of the Grenadier while also protecting the lower edge of the 70% door and under light surrounds.

Retail: \$295

ROOF CROSS

Highlight the ruggedness of the Grenadier by installing a dynamic graphic down the center of the roof and across it from side to side.

Retail: \$595

COMPLETE PACKAGE:

Includes all details

Retail Price \$2,475

Full Package Installation Time: 2-3 days

LEVEL 3

CONTRAST ROOF WRAP

The contrast roof option may not have been available at the time you built your Grenadier. Adding this contrast element provides for a completely different look, visually slimming the vehicle between the wheels. Typically dark colors get a Scottish White roof and light colors get Inky Black, but it can be added in any color of your choosing.

Installation time: 2 days

Retail: \$995

Note: Factory option price \$1,280

LEVEL 4

PAINT PROTECTION FILM

Paint protection films were originally developed by the military to protect helicopters from sand blast damage. These laser cut ultra-thin (typically 6mm), ultra-light urethane films provide unmatched abrasion resistance, enhanced UV protection, and are self-healing. Most importantly they provide robust protection from sand blast, chips and light scrapes, the Grenadier's natural habitat. They also make washing your vehicle easier as the dirt has less adhesion to the film compared to an unprotected finish.

We work with the top two products in the business, Kavaca and STEK. They're available in two finishes, Gloss which is virtually imperceptible leaving the original finish shining through, or Satin, which turns your gloss paint into a matte or satin finish. Can you imagine a satin "Inky Black" or "Donny Grey" Grenadier coming down the road? Pure, unmistakable toughness on four wheels. Tough enough that it comes with a 10 year warranty!

GLOSS FINISH

SATIN FINISH

LEVEL 4

PAINT PROTECTION FILM DETAILS

COMPLETE VEHICLE PAINT PROTECTION FILM

This includes applying either the clear or matte finish film to the entire vehicle's painted surfaces, to completely protect your Grenadier for the long journey ahead. We know our community loves the Grenadier because it's built to last. Twenty years from now your paint could still look brand new. Paint protection films protect your investment and maintain your pride of ownership for years to come, complete with a 10 year warranty!

Installation Time: 4-5 days

Retail: \$8,495

FRONT OF VEHICLE ONLY

The front of the vehicle takes the brunt of the abuse from sand, pebbles and stone chips due to the vertical surfaces, especially at higher speeds. The film would be applied to all painted surfaces from the A-Pillars forward. Includes full coverage of the hood, front fenders, and entirety of the front end. Comes with a 10 year warranty on the film!

Installation Time: 2-3 days

Retail: \$3,500

Note: Paint Protection offered in Gloss or Satin Paint Protection Film (PPF not applied to hinges).

LEVEL 5

WINDOW TINTING

The privacy glass for the rear doors and rear compartment windows are on the lighter side comparative to most SUV's. We suggest adding window tint to help keep the vehicle's cabin cool but also as a theft deterrent to keep your cargo private and out of view. Separately, an additional concern for owners that have the Safari window option is that the glass is too transparent allowing too much heat and sun onto the front seat occupants. Tinting the Safari windows makes the driving experience significantly more comfortable.

Rear Windows | Safari Windows | Front Windows

Installation time: 1 day

Retail: \$999

Rear Windows | Safari Windows

Installation time: 1 day

Retail: \$799

Front Windshield

Installation time: ½ day

Retail: \$499

Note: All window tint is Ceramic based for maximum heat rejection.

LEVEL 5

WINDSHIELD & UV PROTECTION

CLEARPLEX® GLASS PROTECTION

ClearPlex® is an imperceptible film placed on glass which maintains full transparency forming a protective barrier against damage from debris and scratches. Your Grenadier was built to go anywhere, through any weather, on any surface. In Southern California, whether in the desert or on the beach, fine sand can cause pitting and scratching, especially when it collects on the windshield wipers. ClearPlex® can be placed on the windshield, the Safari windows and side glass as an extra layer of protection for both the glass and importantly, the interior, as additional UV protection.

Installation time: ½ day

Retail: \$\$699

CERAMIC COATING

EXTERIOR + INTERIOR

SYSTEM X AVIATION GRADE CERAMIC COATING, INTERIOR AND EXTERIOR APPLICATION

Exterior

System X ceramic coatings are semi-permanent coatings that actually become the functional surface of your vehicle's paintwork. By creating an inseparable bond on a molecular level with your paintwork, you get a coating that cannot be washed off like a wax or sealant. The end result is an extremely durable, color-enhancing gloss that protects exterior surfaces including paint, metal, exhaust, stainless steel, and wheels.

Installation time: 1 day

Retail: \$1,999

Interior

Formulated with advanced ceramic technology, our coating creates an invisible barrier that shields your leather surfaces from the harsh elements of daily use. Say goodbye to stains, spills, and UV damage as our coating repels liquids, dirt, and harmful UV rays, keeping your leather looking pristine for longer.

Installation time: ½ day

Retail: \$895

NOTE: Prices, availability, and turnaround are subject to change without notice, at our discretion.
